When Kids Need Care, We’re Here
Nemours Children’s Health System in Florida reaches from Pensacola to Vero Beach and beyond. In addition to Nemours Children’s Hospital, we have affiliated hospitals across the state where Nemours specialists provide services.

Outpatient Specialty Care in Florida
Outpatient specialty care is available at Nemours Children’s Specialty Care locations across Florida (services available vary by location). It’s also available at outpatient offices located inside Nemours Children’s Hospital in Orlando’s Lake Nona Medical City.

Nemours Children’s Hospital & Emergency Department
Nemours Children’s Hospital is home to experienced teams and world-class experts accustomed to working together to care for kids newborn to age 18. We provide patients and families with:
- all levels of care — treatment for minor injuries to the most complex conditions
- innovative pediatric health care with specialized medical and surgical services
- electronic health record technology that’s ranked among the best in the country
- a “hospital in a garden” design with expansive therapeutic areas as well as nonclinical green spaces for patient and family comfort and solace

24/7 Emergency Care
The Emergency Department (ED) at Nemours Children’s Hospital is equipped to handle all kinds of pediatric emergencies. Unlike a general emergency room, our ED is dedicated exclusively to the care of children from newborn to age 18.

Expert Care Right From the Start
When you bring your child to Nemours, we know you’re placing your trust in us. This trust and our dedication to improving the health of your child are what inspire us to provide exceptional care and the most satisfying experience possible.

Primary Care in Central Florida
Nemours experts partner with your family for the prevention of illness and the treatment of common pediatric health problems and illnesses. Nemours primary care providers include pediatricians, physician assistants and advanced nurse practitioners who have extensive training and experience in diagnosis and treatment for the wide variety of challenges that kids can have from the time they’re born until they turn 18. And if a specialist is necessary, our pediatricians have immediate access to renowned experts in more than 30 pediatric specialties. Visit Nemours.org/FloridaPrimaryCare to find out more.

Kids-Only Urgent Care in Central Florida
Nemours Children’s Urgent Care is ready for kids (from newborns up to age 21) with problems that can’t wait for office hours. Our six urgent care locations are open every day of the year providing evening (5–11 p.m.) and weekend (11–11 p.m.) acute care. Visit Nemours.org/FloridaUrgentCare to find out more.

Specialized Care Just for Children
In Florida, Nemours is home to many specialized pediatric programs, some of which offer care never before available in their respective regions.

- Nemours Cardiac Center in Florida opened in 2016, expanding our existing expert cardiology services to include integrated care for kids with all types of heart disease.
- Nemours pediatric radiologists are at the forefront of imaging and image-guided therapies, offering innovative ways to diagnose and treat conditions in a minimally invasive way.
- Our neuromuscular program offers the area’s only Muscular Dystrophy Association-approved clinic, and Nemours Children’s Hospital is one of only four locations in the world conducting the first targeted drug trial for spinal muscular atrophy.
- Nemours orthopedic specialists develop treatments to help children with bone, muscle and joint conditions become more independent. For example, the Limb Lengthening and Reconstruction Center team performs minimally invasive surgery to insert a magnetically controlled device to help arms or leg bones grow longer.
- Our Vascular Anomalies Program provides expert evaluation and treatment for children with vascular (blood or lymph vessel) conditions such as hemangiomas and arteriovenous malformations.
- Nemours Center for Cancer and Blood Disorders (NCCBD) isn’t just a single “place.” But a multitude pediatric oncology and hematology program made up of four care locations, three of which are in Florida (all are members of the Childhood’s Oncology Group).
- In cooperation with Wolfson Children’s Hospital and the UF Health Pediatric Health Management Center in Jacksonville, we offer families the Nemours Cardiometabolic and Bariatric Center to provide expert evaluations and treatment for pediatric obesity.
- Our International Adoption Medicine Program addresses the unique medical and developmental needs of internationally adopted children.
- Juvenile arthritis care at Nemours is directed by one of the nation’s leading experts.
- Our Cochlear Implant Program offers services and devices to help kids with severe deafness gain language skills on pace with their peers.
- The Comprehensive Concussion Center offers personalized diagnosis, treatment and community education from specialists in several disciplines.
